

R432. Health and Human Services, Health Care Facility Licensing.

R432-8. Specialty Hospital - Substance Use Disorder Construction.

R432-8-1. Legal Authority.

This rule is authorized by Section 26B-2-202.

R432-8-2. Purpose.

(1) This rule applies to a specialty hospital whose major single service is the treatment of patients with substance use disorder. The rule identifies the construction standards for a specialty hospital.

R432-8-3. General Design Requirements.

Rule R432-4 additionally applies to construction of a substance use disorder specialty hospital..

R432-8-4. General Construction, Ancillary Support Facilities.

(1) Section R432-4-19 applies to construction of a substance use disorder specialty hospital and the licensee shall ensure compliance with the following modifications:

- (a) corridors in-patient use areas are a minimum six feet wide;
- (b) door leaf width for patient room doors and doors to patient treatment rooms are a minimum three feet;
- (c) ceiling construction in patient and seclusion rooms are monolithic;
- (d) bed pan flushing devices are optional;
- (e) windows, in rooms intended for 24-hour occupancy are operable;
- (f) an on-site emergency generator shall be provided with the following services connected to it:
 - (i) life safety branch;
 - (ii) critical branch;
 - (iii) equipment system;
 - (iv) telephone;
 - (v) nurse call;
 - (vi) heating equipment necessary to provide adequate heated space to house all patients under emergency conditions;
 - (vii) one duplex convenience outlet in each patient bedroom;
 - (viii) one duplex convenience outlet at each nurse station; and
 - (ix) duplex convenience outlets in the emergency heated area at a ratio of one for each ten patients;
- (g) a nurse call system is optional; and
- (h) if a nurse call system is installed, provisions shall be made for the easy removal or covering of call buttons.

(2) If the licensee chooses to have a dual major service, then both of the appropriate specialty hospital construction rules apply.

R432-8-5. General Construction, Patient Service Facilities.

(1) The licensee shall comply with Sections R432-4-20 and R432-4-12. Where a modification is cited in this rule, the modification shall supersede a conflicting requirement.

(2) The licensee shall ensure the following in patient service settings:

- (a) the environment of the nursing unit gives a feeling of openness with emphasis on natural light and exterior views;
- (b) interior finishes, lighting, and furnishings, suggest a residential rather than an institutional setting;
- (c) security and safety devices are presented in a manner that will not attract or challenge tampering by patients;
- (d) at least two single-bed rooms, with private toilet rooms, are provided for each nursing unit;
- (e) minimum patient room areas, exclusive of toilet rooms, closets, lockers, wardrobes, alcoves, or vestibules, measure 100 square feet in single-bed rooms and 80 square feet per bed in multiple-bed rooms;
- (f) patient rooms include a wardrobe, closet, or locker, with minimum clear dimensions of 22 inches deep by 36 inches wide, suitable for hanging full-length garments, with a break-away clothes rod and adjustable shelf;
- (g) visual privacy is not required in all multiple-bed rooms, however privacy curtains are provided in 5% of multiple-bed rooms for use in treating detoxification patients;
- (h) laundry facilities are available to patients, including an automatic washer and dryer;
- (i) bathing facilities shall be provided in each nursing unit at a ratio of one bathing facility for each six beds not otherwise served by bathing facilities within individual patient rooms and comply with the following:
 - (i) each bathtub or shower is in an individual room or enclosure adequately sized to allow staff assistance and designed to provide privacy during bathing, drying, and dressing; and
 - (ii) at least one shower in central bathing facilities is designed for use by a wheelchair patient;
 - (j) a toilet room with direct access from the bathing area is provided at each central bathing area and complies with the following:
 - (i) doors to toilet rooms shall permit access from the outside in case of an emergency;
 - (ii) a handwashing fixture is provided for each toilet in each toilet room; and
 - (iii) at least one patient toilet room in each nursing unit contains a shower or tub in addition to the toilet and lavatory and fixtures are wheelchair accessible;

- (k) there is at least one seclusion room for each 24 beds located for direct nursing staff supervision or equipped with a closed circuit television system with a monitor at the nursing station that complies with the following:
- (i) each seclusion room is designed for occupancy by one patient and complies with the following;
 - (ii) the room has an area of at least 60 square feet and is constructed to prevent patient hiding, escape, injury, or suicide;
 - (iii) if a licensee has more than one nursing unit, the number of seclusion rooms shall be a function of the total number of beds in the facility;
 - (iv) seclusion rooms may be grouped in a common area;
 - (v) special fixtures and hardware for electrical circuits is used to provide safety for the occupant;
 - (vi) doors are 44 inches wide and permit staff observation of the patient while providing patient privacy;
 - (vii) seclusion rooms are accessed through an anteroom or vestibule large enough to safely manage the patient and also provide direct access to toilet rooms; and
 - (viii) seclusion rooms including floor, walls, ceiling, and all openings, are protected with no less than one-hour-rated construction.

R432-8-6. Additional Specific Category Requirements.

- (1) The licensee shall ensure the facility layout includes a minimum total inpatient space for dining, recreation, and day use computed on the basis of 30 square feet per bed and complies with the following:
- (a) there is a minimum of 200 square feet for outpatients and visitors when dining is part of a day treatment program;
 - (b) if dining is not part of a day treatment program, there is a minimum of 100 square feet of additional outpatient day space; and
 - (c) enclosed storage space for recreation equipment and supplies is provided in addition to the requirements of day use.
- (2) The licensee shall provide at least two separate social areas, one designed for noisy activities and one designed for quiet activities as follows:
- (a) at least 120 square feet is provided for each area;
 - (b) the combined area of the two areas shall be at least 40 square feet per patient;
 - (c) activity areas may be utilized for dining activities and may serve more than one adult nursing unit;
 - (d) activity areas are provided for pediatric and adolescent nursing units that are separate from adult areas; and
 - (e) space for group therapy is provided and activity spaces may be used for group therapy activities.
- (3) The licensee shall provide examination and treatment rooms, except when all patient rooms are single-bed rooms and the licensee shall ensure examination and treatment rooms comply with the following:
- (a) an examination and treatment room may be shared by multiple nursing units;
 - (b) if provided, the room measures a minimum floor area of 110 square feet, excluding space for vestibules, toilet, closets, and work counters, whether fixed or movable;
 - (c) the minimum allowable floor dimension is ten feet; and
 - (d) the room contains a sink equipped for handwashing, work counter, storage facilities, and a desk, counter, or shelf space, for writing.
- (4) The licensee shall provide a consultation room as follows:
- (a) rooms have a minimum floor space of 100 square feet, and are provided at a room-to-bed ratio of one consultation room for each 12 beds;
 - (b) they are designed for acoustical and visual privacy and constructed using wall construction assemblies with a minimum Sound Transmission Class rating of 50; and
 - (c) they provide appropriate space for evaluation of patient needs and progress, including work areas for evaluators and work space for patients.
- (5) The licensee shall provide a multipurpose room for staff and patient conferences, education, demonstrations, and consultation as follows:
- (a) it is separate from required activity areas defined in Subsection R432-8-6(2); and
 - (b) if provided in the administration area, it may be utilized for this requirement if it is conveniently accessible from a patient-use corridor;
 - (6) if child education is provided through facility-based programs, a room shall be provided in the adolescent unit for this purpose as follows:
 - (a) the room measures at least 20 square feet per pediatric and adolescent bed, but not less than 250 square feet; and
 - (b) multiple use rooms may be used, but shall be available for educational programs on a first priority basis.
 - (7) The licensee shall ensure the following:
 - (a) pediatric and adolescent nursing units are physically separated from adult nursing units and examination and treatment rooms;
 - (b) in addition to the requirements of Subsections R432-8-6(1) through (5), individual rooms or a multipurpose room is provided for dining, education, and recreation;
 - (c) insulation, isolation, and structural provisions minimize the transmission of impact noise through the floor, walls, or ceiling of these multipurpose rooms;
 - (d) service rooms may be shared by more than one pediatric or adolescent nursing unit, but may not be shared with adult nursing units;

- (e) a patient toilet room, in addition to those serving bed areas, shall be conveniently accessible from multipurpose rooms; and
- (f) storage closets or cabinets for toys, educational, and recreational equipment is provided.

R432-8-7. Penalties.

- (1) The department may assess a civil money penalty of up to \$10,000 and deny approval for patient utilization of new or remodeled areas if a health care provider does not submit architectural drawings to the Office of Licensing.
- (2) The department may assess a civil money penalty of up to \$10,000 if the licensee fails to follow approved architectural plans.
- (3) The department may assess a civil money penalty of up to \$1,000 per day for each day a new or renovated area is occupied before licensing agency approval.
